PROFESSIONAL SUMMARY

"Aspiring Data Scientist with a strong foundation in Python, Machine Learning, and Data Analytics. Skilled in exploratory data analysis (EDA), predictive modeling, and data visualization, with a passion for leveraging data-driven insights to solve real-world problems. Eager to contribute to impactful business decisions by tackling big projects with the latest technology. Collaborative team player with a commitment to continuous learning and enhancing skills in statistics, machine learning, and data visualization. Seeking an entry-level data science role at an innovative firm that values analytics, coding, and a passion for data."

EDUCATION

MBA, Human Resources (HR)

Adikavi Nannaya University, AP | 2023

Bachelor of Commerce (Computers)

Adikavi Nannaya University, AP | 2021

TECHNICAL PROFICIENCY

- **Data Analysis & Visualization:** Exploratory Data Analysis (EDA), Data Preprocessing, Data Visualization (Matplotlib, Seaborn)
- **Model Building:** Scikit-learn, Machine Learning, Deep Learning
- **MLOps & Deployment:** Model Deployment, MLOps Practices
- **Natural Language Processing & AI:** NLP, Artificial Intelligence
- **Generative AI & Large Language Models:** Gen AI, Lang Chain, RAG, Finetuning, LLMs, GPT
- **Programming & Tools:** Python, SQL, power bi

INTERNSHIP

Ramanasoft Tech – Ameerpet , Hyderabad

- Supported staff members in daily tasks, reducing workload burden and improving efficiency.
- Gained hands-on experience in applying learned concepts to real-world industry scenarios.
- Analyzed problems and collaborated with teams to develop solutions.
- Managed multiple tasks while adhering to strict deadlines

PROJECTS

ADVANCED MULTI-MODAL RETRIEVAL-AUGMENTED GENERATION (RAG) SYSTEM

INFORMATION: Developed a Multi-modal Retrieval-Augmented Generation (RAG) system leveraging transformers, PyTorch, NLP, and deep learning. Implemented self-attention mechanisms, encoder-decoder architectures, and fine-tuned models for document retrieval, image processing, and text generation. Integrated LangChain, ChromaDB, OpenAI, and Groq APIs to enhance multi-document retrieval and vector-based search.

TECHNOLOGIES USED: LangChain, Transformers, NLP, PyTorch, ChromaDB, OpenAI, Groq

INTELLIGENT DOCUMENT RETRIEVAL & Q&A WITH RAG

INFO: Built a RAG system that uses transformers and NLP to answer questions from documents. Integrated LangChain, Hugging Face, ChromaDB, and Groq API to process PDFs, find relevant content, and generate structured responses. Designed a custom prompting method to improve accuracy.

TECH USED: LangChain, Hugging Face, Transformers, NLP, PyTorch, ChromaDB, Groq API, Llama Models
